ACKNOWLEDGMENTS

We are deeply grateful to researchers in the field of education and parent involvement whose work guided our efforts. Joyce Epstein, Co-Director of the Center on Families, Communities, Schools, and Children's Learning at Johns Hopkins University, has graciously allowed us to "operationalize" her basic concepts, typology, and best practices based on her years of research and work with schools. Her work has had an enormous impact on ours. We also owe significant thanks to Janet Chrispeels, Professor of Education at the University of California at Santa Barbara, for helping shape our ideas through her research and practice.

We are indebted to Don Davies, founder of the Institute of Responsive Education, and fellow researcher, Vivian Johnson, professor at Boston University, along with their colleagues for sharing their work with us over the years and for encouraging our efforts. The work of James Comer and the School Development Program has greatly influenced our thinking about the importance of partnerships between parents and school staff.

We also wish to acknowledge the support of María Reyes, Family and Community Partnerships Office, California State Department of Education, for our work in San Diego City Schools.

Dedicated to the Memory of

Susan McAllister Swap,
parent involvement researcher and
professor at Wheelock College

and

Harold J. Ballard,
District Advisory Council for
Compensatory Education Chairperson,
San Diego City Schools
